PSD2 Compliance Product

Our value proposition

16/10/2018

1

Our **PSD2 offer** in one slide

What is needed to become PSD2 compliant ?

Finologee's value proposition enables you to ...

Standard Components

Manage Third Party Connections

- Ensure AISP/PISP Authentication (TLS, eIDAS, Preta repository)
- Multiple standards: STET, Berlin Group, UK Open Banking)

Handle Strong Customer Authentication

- RTS-compliant SCA OAuth2, OpenID, SAML, Luxtrust ...
- Token generation and validation

Monitor Third Party Provider activity

- Consent lifecycle management & bank/TPP support
- Filtering & Quota Management (call quotas & response caching)

Our Bonus

Get full business intelligence & stats

- Advanced business intelligence module (option)
- Details on TPPs, type of data, origin
- Statistics, charts, exports

2

3 reasons to **work with us**

Reason 1: We operate high volume transactional platforms since 2006

SMS Routing & Payments > **10M transactions/year**

National mobile payment system operated since 2012 (5 banks)

99,96 %
Availability*

*Overall platforms availability level since 2006

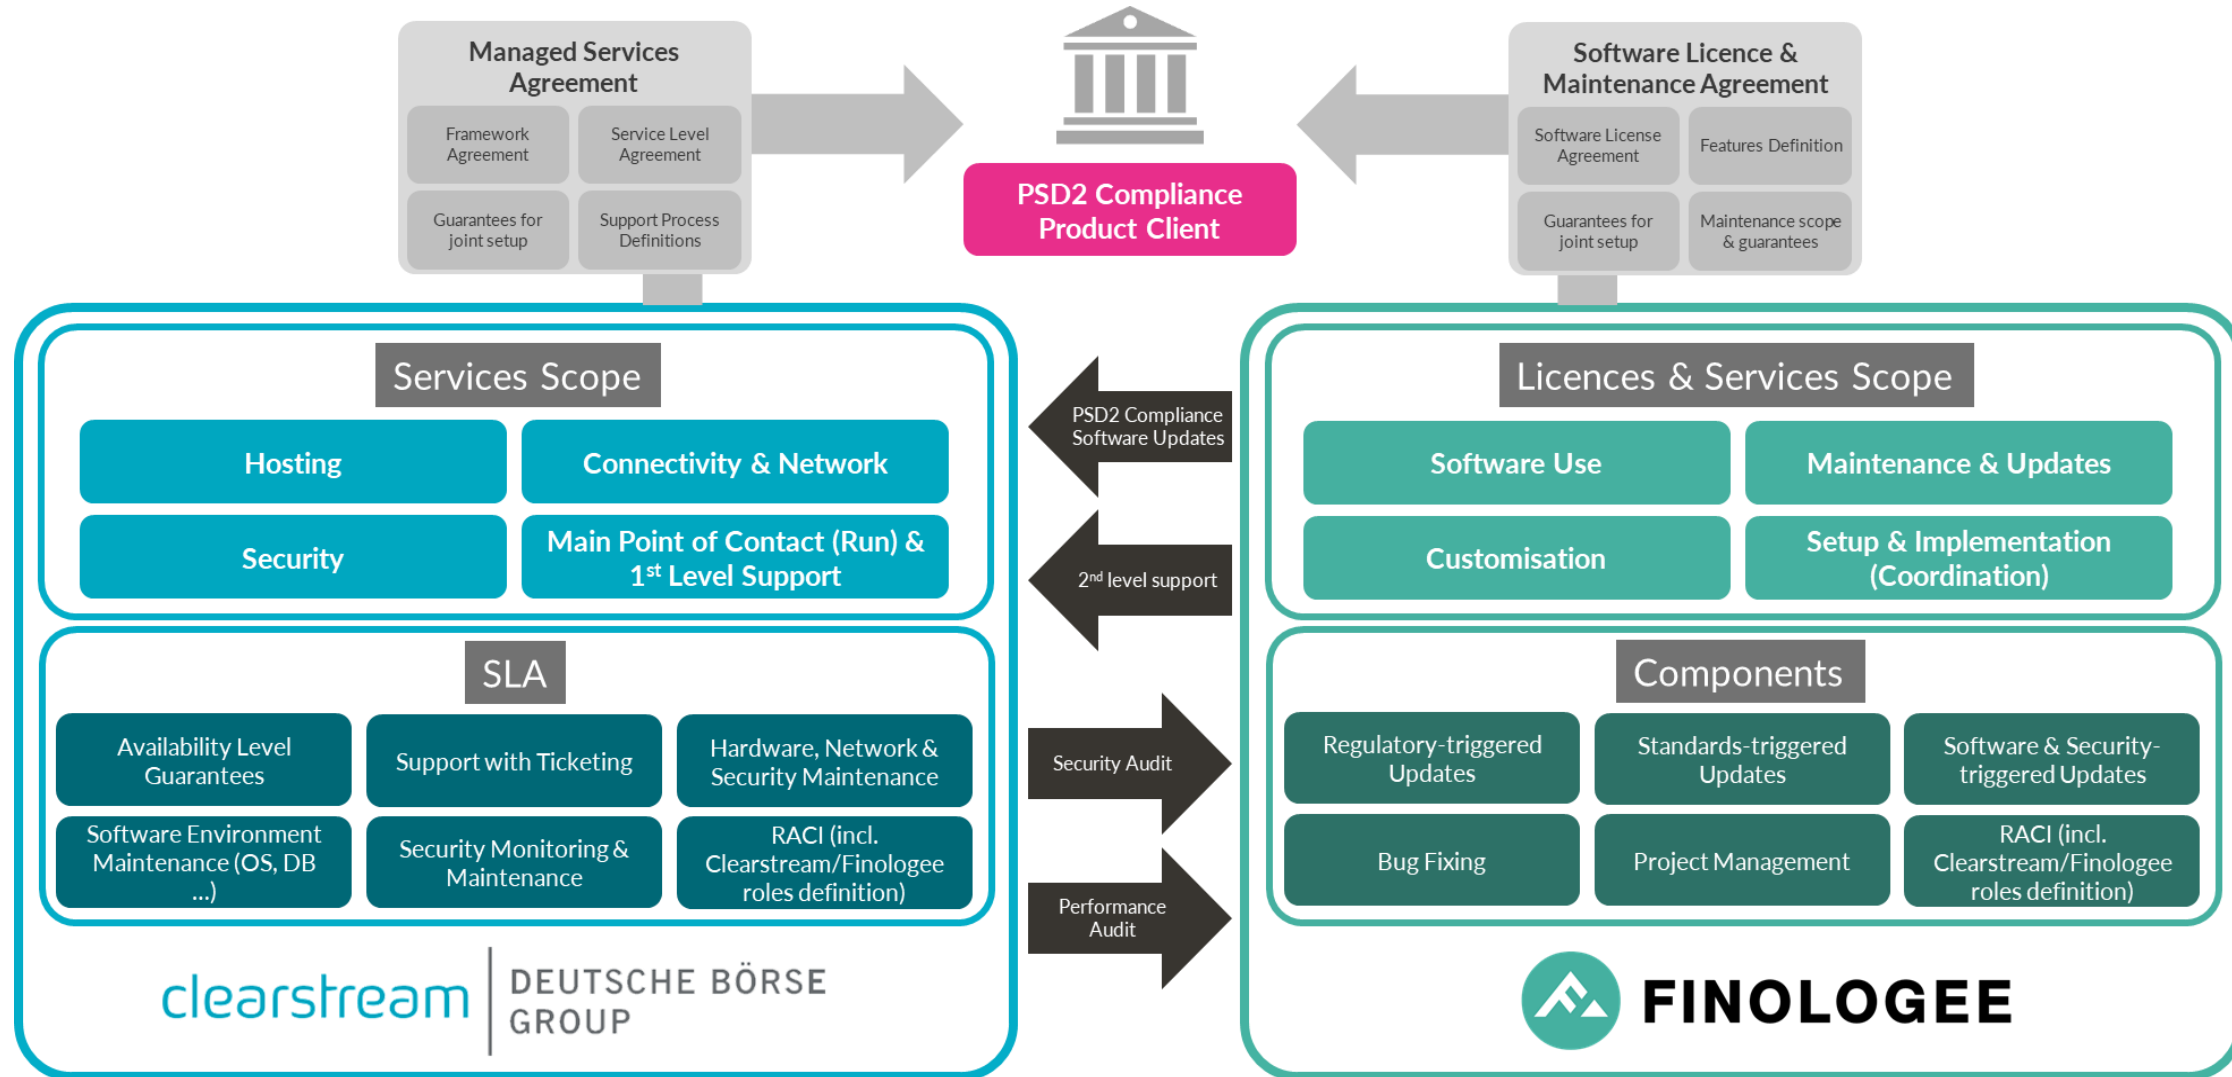

clearstream

Hosting/operations by renowned partner

High-performance monitoring & 24/7 emergency availability

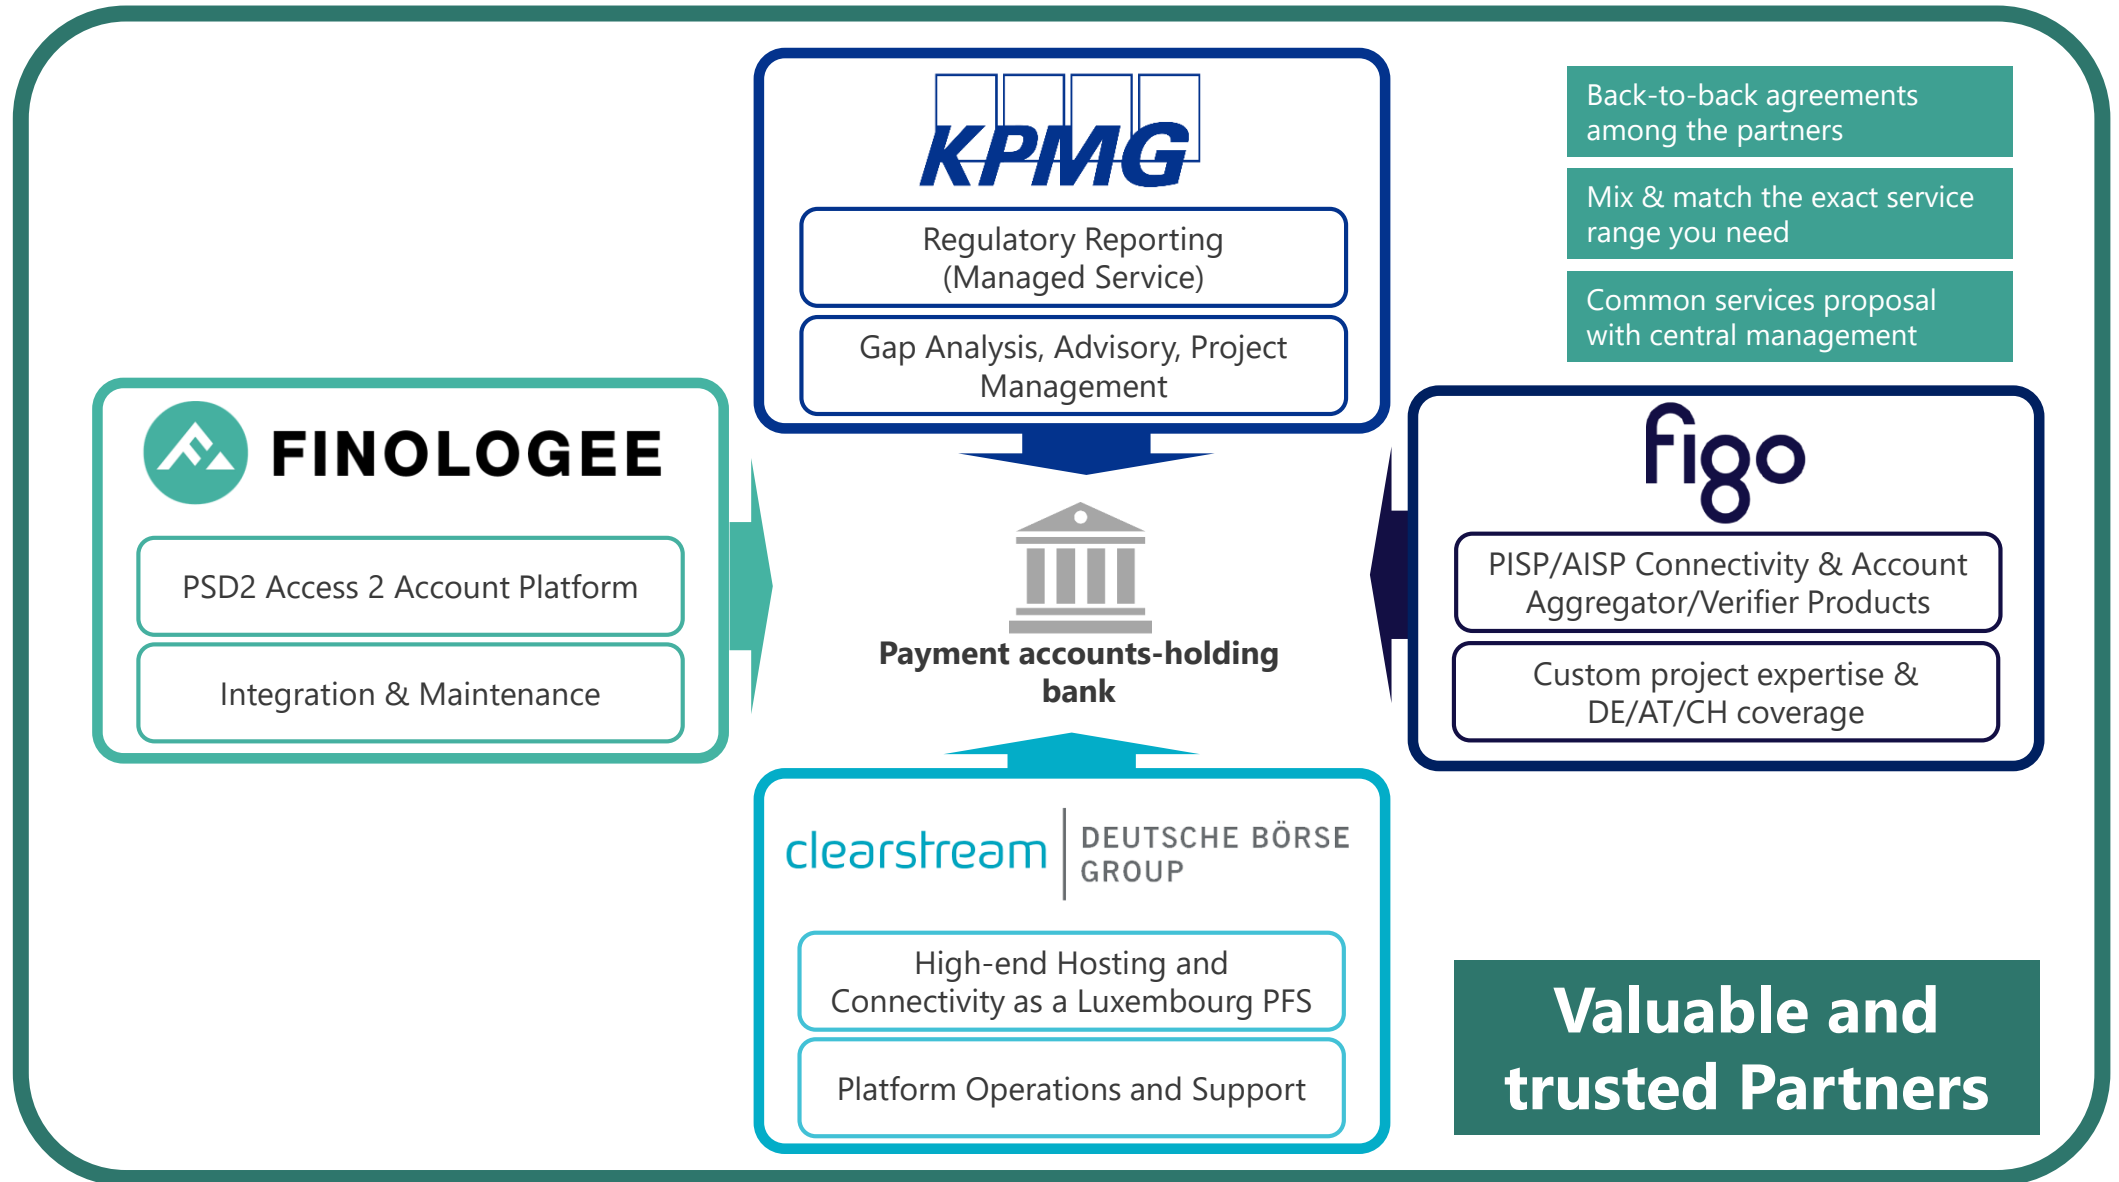

Reason 2: Hosting Platform: the best partner you can get in Luxembourg

Reason 3: Full coverage through an alliance of 4 experts

3

The **bottom line** ...

What you'll get (only) with us - USP

One-stop-shop PSD2 Solution

- A **ready-to-use environment** for API access management of **AISPs** and **PISPs**
- **Minimum implementation** and **maintenance efforts** on the bank's **existing infrastructure**
- All relevant **monitoring data** in relation with **RTS** on **SCA** and **secure communication**

Total Neutrality

- **No** banking software/vendor/supplier **dependency**
- Fully **neutral & independent** shareholder structure, operations & development teams, **no strategic conflicts of interest**

Flexibility & Performance

- **Flexibility** around clients' needs: **tailored-made proposal** based on IT and Business requirements
- **Continuous improvements & implementations**, built on top of a high-performance FinTech Acceleration Platform

Client oriented requirements approach

- Customised solution for **Private and Retail Banks** – including solution deployment for branches/subsidiaries within EEA
- Sandbox: **isolated & feature-complete test environment for TPPs**, making a connection to the bank's production environment optional for March 2019
- Capacity to **adapt the connectivity and API** to the banks needs

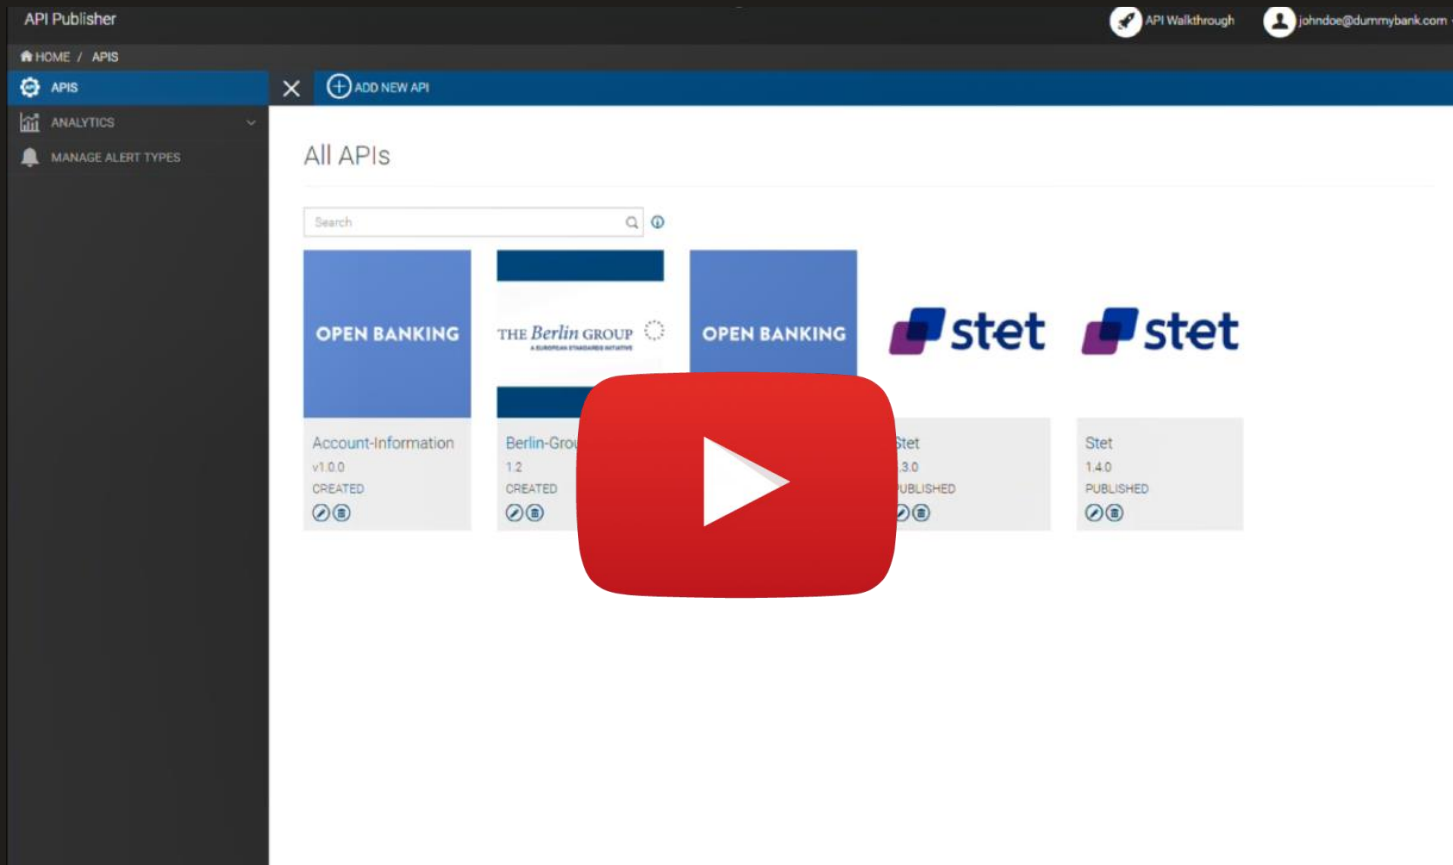

High-end & compliant Hosting & Ops

- Hosting & infrastructure **operations** by Clearstream, a company managing some of the most critical infrastructures in the world (T2Securities & several stock exchanges)
- **Complete outsourcing – full SLA coverage**
- Will be operated under Luxembourg **PFS license** (both Finologie & Clearstream)
